As-Built Requirement — 30' Wide & Over

As-built engineering plans are required on all orders 30' wide and over. For structures this size a simple diagram is insufficient; engineering drawings ensure accuracy in production and installation for your customer.

Revision & Change Order Policy

To cover the administrative and physical costs of late-stage changes:

- **Standard revisions (pre-scheduling):** every order receives one free revision; each additional revision is a \$25 clerical fee.
- **Orders in scheduling:** once an order moves to scheduling, the clerical fee is \$50 per additional revision.
- **Materials ordered — customer material change:** if the order is in scheduling and materials have been ordered, a material change makes the customer responsible for the cost of the original custom materials removed (e.g., colored roll-up doors, special components) + new materials + a \$250 restocking fee.
- **Materials ordered — customer hold:** if the order is in scheduling and materials have been ordered, placing the order on hold incurs a \$250 restocking fee.
- **Clarification:** clerical fees and engineering fees (if applicable) are billed in addition to one another — neither overrides the other. All revisions require a newly signed Purchase Order that explicitly includes the clerical fee and any updated material, engineering, or restocking costs.

Materials-ordered situations are reviewed case by case. The goal is not to penalize the customer, but we cannot absorb the cost of custom materials changed or abandoned late in the process.

Freight Charge Policy

All orders exceeding 43' in width and/or 100' in length, and any order with a custom roof-pitch design, are subject to a minimum freight charge of \$1,750 or 3% of the building cost (pre-tax), whichever applies.

Lift Requirements

Lull lift required on any building that is:

- 32' wide or wider, or
- 15' in height or taller, or
- built with a non-standard (special-order) roof pitch.

Genie lift required on any roll-up door that is:

- 14' in height or taller, or
- 16' in width or wider.
